Product Placement Analysis story
Clothing is our highest-performing category by volume, but sales are declining during the promotion because the average price is being raised rather than lowered.
Our sales are highly concentrated in the "High Foot Traffic" area. Going forward, in order to increase sales, it would be worthwhile exploring the "Low" foot traffic bubbles.
Clothing is winning the "Front of Store" battle in terms of sales volume, with an average of 1,923.7 compared to Food in the "Front of Store" at 1,672.7. It is interesting to note that Electronics is doing the best in the Aisle (1,780.9) rather than at the End-cap.
