Customer Problem Statement:

Problem Statement (PS)	**I am (Customer)**	**I'm trying to**	**But**	**Because**	**Which makes me feel**
PS-1 : Seasonal Inventory & Demographics	A Marketing and Inventory Planner.	Tailor our product stock levels based on seasonal demand and consumer demographics.	It is hard to identify which demographic segments (e.g., Seniors vs. Young Adults) drive the most volume during "Seasonal" periods versus "Non-Seasonal" periods	We are looking at total sales numbers without an interactive way to filter by both season and customer type simultaneously.	Overwhelmed by raw data and concerned about potential overstock or stockouts for key target audiences.
PS-2 : Pricing Competitiveness	A Retail Pricing Manager.	Optimize our product pricing strategy to increase sales volume.	I lack clear visibility into how our prices compare directly against competitors across different categories.	Our current data is siloed, making it difficult to see the "price gap" and its immediate impact on customer choice.	Uncertain about our market positioning and frustrated by missed revenue opportunities.
