Project Design Phase-II
Data Flow Diagram & User Stories

Date	5 march 2026
Team ID	
Project Name	Product Positioning & Sales Performance Analysis
Maximum Marks	4 Marks

Data Flow Diagrams:

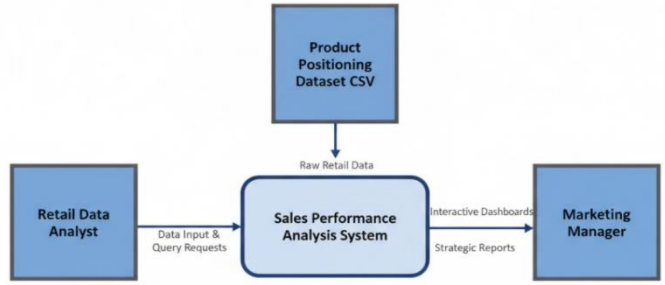
A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

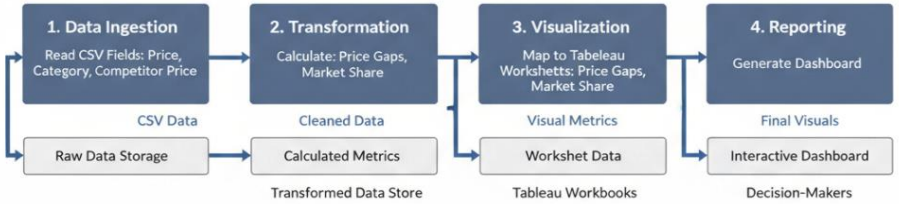
1. Data Flow Diagram (DFD)

Product Positioning & Sales Performance Analysis, the flow of information generally moves from raw retail data to strategic insights:

- **Level 0 (Context Diagram):** * **External Entities:** Retail Data Analyst, Marketing Manager, Product Positioning Dataset (CSV).
    - **Process:** Sales Performance Analysis System.
    - **Flow:** The Analyst inputs the CSV; the System outputs Interactive Dashboards and Strategic Reports to the Manager.
- **Level 1 (Detailed Process):**
    1. **Data Ingestion:** Reading the CSV fields (Price, Category, Competitor Price).
    2. **Transformation:** Calculating "Price Gaps" and "Market Share."
    3. **Visualization:** Mapping these metrics into Tableau worksheets.
    4. **Reporting:** Generating the final dashboard for decision-makers.

Data Flow Diagram (DFD)





Level 2: User Stories.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Marketing Planner	Data Integration	USN-1	As a planner, I want to import the Product Positioning CSV so that I can analyse our current market standing.	System successfully maps Price, Category, and Sales Volume fields.	High	Sprint-1
Retail Analyst	Data Preparation	USN-2	As an analyst, I want to create a "Price Gap" calculation to see how our prices differ from competitors.	A new metric shows the exact dollar difference between our price and competitor price.	High	Sprint-1
Marketing Manager	Core Visualization	USN-3	As a manager, I want to see a Heat Map of sales by product position (Aisle vs. End-cap).	The dashboard clearly highlights which shelf positions drive the highest volume.	High	Sprint-2
Sales Lead	Demographic Analysis	USN-4	As a sales lead, I want to view a Donut Chart of sales by demographic (e.g., Seniors vs. Kids).	Users can identify which age group is the primary buyer for a specific category.	Medium	Sprint-2

Pricing Manager	**Interactivity**	**USN-5**	**As a pricing manager, I want to filter the entire dashboard by "Seasonality."**	**All charts update instantly to show performance during "Seasonal" vs "Non-Seasonal" periods.**	**High**	**Sprint-3**
Business Owner	**Strategic Insights**	**USN-6**	**As an owner, I want to see KPI cards for "Total Sales Volume" and "Average Price Index."**	**The top of the dashboard displays summarized business health metrics at a glance.**	**Medium**	**Sprint-3**
General User	**Finalization**	**USN-7**	**As a user, I want clear tooltips when I hover over data points.**	**Hovering over a chart element reveals specific Product IDs and exact Sales figures.**	**Low**	**Sprint-4**
