Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	5 march 2026
Team ID	
Project Name	Product Positioning & Sales Performance Analysis
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Data Integration	Ability to import and process the Product Positioning CSV dataset. Successful mapping of fields like "Price," "Competitor Price," and "Category".
FR-2	Analytical Visualizations	Generate a bar chart comparing "Average Sales Volume" across categories. Create a side-by-side comparison of "Our Price" vs "Competitor Price".
FR-3	**Interactive Filtering**	Filter dashboard data by "Seasonality" (Yes/No) to see trend changes. Segment sales volume views by "Consumer Demographics" (e.g., Young Adults, Seniors).
FR-4	**Strategic Insights**	Dynamically identify top-performing product categories based on sales volume.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	The dashboard must have an intuitive layout with clear tooltips so analysts can interpret price gaps easily.
NFR-2	**Performance**	Visualizations and filters should update in under 2 seconds when interacting with the dataset.
NFR-3	**Accuracy**	Aggregated calculations (like Average Sales) must match the raw source data with 100% precision.

NFR-4	Availability	The dashboard should be accessible via the Tableau Server/Cloud for stakeholders at any time.
NFR-5	**Scalability**	The system should maintain performance even if the product dataset grows from hundreds to thousands of rows.
